Items Polska Sp. z o. o. was established in 2004 in Cracov.

The main purpose of our company is co-operation with other companies and public utility institutions in order to improve condition of environment and human's surroundings i.a. improvement of water and ground quality in the territory of our country as well as improvement and environment work protection for everyone of us.

Our mission is to achieve the satisfaction and good results for all interested in the solution of given problem. In the selection of solutions to our partners we are guided by common business. It is possible because of capacitance of access to cheap, innovative, good and simply in using technologies. During implementing solutions we are using our technical and technological ideas as well as solution offered by our partners.

We take up working out technologies, project and performance in environmental protection, especially in water and sewage treatment, building and updating of sewage treatment plants as well as introducing biotechnology and other chemical and physicochemical methods in sewage treatment.

We project and produce equipment using to purification rain wastewaters and others. We specialize i.a. in systems installation using to remove petroleum-derived wastes, suspensions and other substances destructive for environment. Our solutions are much more cheaper in installation and using. We use units of our production – EcoSeparators. Effectiveness of sewage treatment from suspensions and petroleum – derived wastes result 94 – 98%.

Our Company intends to extension offer about projects connected with sewage treatment, land reclamation as well as removing from sewage and sewage's sludge heavy metals descended from hydrometallurgy of zinc, dioxines and other substances destructive for enviroment.

We also lead actions connected with estimation of environmental hazard through implement environmental audits as well as operations within capacity of EDD/ESA. In this field we co-operate i.a. with high-class specialists from University of Science and Technology (AGH) in Cracov as well as with Main Institute of Mining in Katowice.

Our solutions are notified in Patent Office.

For the purpose of acquire “green energy” we started researches aim at introduce projects connected with wind-power engineering, acquisition and use of solar energy as well as acquisition energy from termic processing of wastes.

Items Polska Sp. z o.o. takes part also in competitive bidding, advertised bidding and public auction.

For co-operation we are searching for Companies, which products, devices, biological and chemical preparation, technologies and biotechnologies agree to improvement natural enviroment we would offer and introduce into our market and market of our neighbour - Slovakia and Ukraine.

Items Poland Sp. z o. o. realizes projects of wind energy in different levels of advanced. We and our specialists offer realization of many services which consist on complex management of wind energy projects (also from greenfield level):

- *analysis of the risk for determined location,*
- *spatial project of wind farm,*
- *tentative project of connection to the network,*
- *building of economic models, prognostication of outlays,*
- *organization of finance, preparation of application about bailout,*
- *measurements of wind,*
- *analysis of the productivity,*
- *obtainment of administrative decisions on behalf of investor,*
- *preparation and signing of contracts for connection,*
- *preparation, negotiations and signing of contracts for electric energy selling,*
- *geological investigations,*
- *construction and energetic design,*
- *preparation and depositing an application about receiving of licence,*
- *negotiations with constructors and contractors of turbine,*

- *supervision over a constructors of successive stage of enterprise,*
- *taking the charge of investment process right up to activation the farm,*
- *service of the farm and removing its damages, coordination of periodical service, realization of payments on behalf of investor,*
- *consultancy in buying and selling of projects in different levels of advanced.*

We are willing to co-operation with investors who are interested in development of own projects of wind energy in Poland.

Clients of our Company are: power plants, thermal power plants, mines, transport bases, markets, and all these enterprises which generate environmental contamination. Among others, firm cooperates in Poland with such enterprises as:

GROUP OF THERMAL POWER PLANT BYDGOSZCZ S.A.,

POWER STATION SKAWINA S.A.,

SGL „CARBON POLSKA” S.A.,

FTT „STOMIL WOLBROM” S.A.,

transport bases (MZK Bielsko-Biala, MPK Kielce, PKS Ciechanów and other),

firm MARTON M. MAŁYSZ – MERCEDES SERVICE Ltd,

GROUP GEDEON RICHTER - „POLFA GRODZISK”,

Cement Plant "ODRA",

TRANSBUD NOWA HUTA S.A.,

DOCKYARD "CENTROMOST – PLOCK",

TRI POLAND which belongs to TOKAI RUBBER INDUSTRIES,

and other economic subjects.
